EDUCATION

UOW College Hong Kong

Associate of Science in Creative and Interactive Media Production

Hong Kong

2019 – 2021

SKILLS

Frontend: JavaScript/TypeScript, React, Vue, Next.js, Remix, HTML, CSS, Tailwind CSS

Backend: Node.js, Express, Fastify, Python, Django, Java (J2EE, Java 7, 8, 15)

Databases: PostgreSQL, MySQL, MongoDB, Redis, Railguard (Vector DB)

AI & Generative AI: LangChain, LangGraph, LlamaIndex, Dify, vLLM, PyTorch/CUDA, RAG pipelines, MCP integration, Hugging Face, n8n workflow automation

CI/CD & DevSecOps: GitLab CI, Jenkins (Groovy scripting), Git, GitHub Actions, Azure DevOps Pipelines, JIRA, SonarQube, Nexus, Harbor

Monitoring & Observability: Grafana, Loki, Prometheus, Splunk

Infrastructure & Cloud: Docker, Kubernetes (CKAD certified), Terraform, Helm, Ansible, Proxmox, Linux/RHEL administration

Cloud Platforms: AWS (CLP, SAA certified), Azure (DevOps, Databricks), GCP, Oracle Cloud, Cloudflare

Testing: PyTest, Selenium, Playwright, unit/integration/automated testing

Languages: Chinese (Cantonese): Native, Chinese (Mandarin): Native, English: Fluent

EXPERIENCE

Prudential (Hong Kong) Limited

Platform Engineer, Data Transformation Scrum Team

Hong Kong

Nov 2025 – Current

- Platform Engineer in the Data Transformation Scrum Team, collaborating with cross-functional teams including data scientists and AI specialists to deliver data platform infrastructure in Agile sprints via JIRA within a large-scale financial services enterprise.
- Build and maintain full-stack platform infrastructure using Terraform, Helm for Kubernetes deployments, GitHub Actions and Jenkins for CI/CD pipelines with automated testing, artefact management, security scanning, and multi-environment deployments.
- Develop and manage data pipelines and analytics workloads on Azure Databricks (Spark-based), integrating AI/ML models into platform services for business use cases including marketing analytics and data-driven decision making.
- Self-hosted and served open-source LLMs with vLLM on NVIDIA DGX Spark (CUDA/GPU-accelerated) for high-throughput, low-latency inference, and built Retrieval-Augmented Generation (RAG) pipelines and LLM applications using LangChain integrated with vector databases for enterprise knowledge retrieval.
- Set up and managed an AI Gateway layer (Kong and Bifrost) for centralized LLM routing, rate limiting, authentication, and observability, and implemented Guardrails for prompt/response validation, PII redaction, and content safety to ensure responsible AI usage.
- Designed and operated CI/CD pipelines (GitHub Actions and Jenkins) to automate build, testing, and multi-environment deployment of LLM serving infrastructure and AI Gateway components on Kubernetes.
- Monitor platform health and performance using Grafana dashboards with Loki and Prometheus. Identify and resolve bottlenecks, proposing and implementing improvements to existing systems and processes.
- Participate in project planning sessions to analyse development requirements, evaluate emerging technologies, and conduct proof-of-concept (PoC) evaluations to improve platform scalability and performance.

PCCW Solutions

DevOps Engineer

Hong Kong

Mar 2025 – Nov 2025

- DevOps Engineer for the largest Hong Kong eMPF Platform – a central electronic platform for MPF scheme administration in a large-scale financial services enterprise environment.

- Designed and operated CI/CD pipelines using Jenkins and Git (Bitbucket) for deploying web applications, Android, and iOS apps, integrating unit testing, integration testing, artefact management, SonarQube security scanning, and multi-environment deployments.
- Created automation scripts using Python, Bash, and Jenkins Groovy while implementing Docker containerization. Managed deployment lifecycle on Red Hat OpenShift (Kubernetes) with Oracle Database environments.
- Integrated DevSecOps tooling including CyberArk, HashiCorp Vault, SonarQube for code quality, and Splunk for security monitoring throughout CI/CD pipelines. Coordinated workflows using JIRA.
- Collaborated with cross-functional Application Teams, Architects, and QA to ensure seamless version control, automated testing, and environment setup in a continuous delivery environment.
- Deployed and configured web applications on Nginx, MuleSoft API Gateway, and Solace. Managed service integrations with internal and external APIs within private cloud infrastructure.
- Monitored platform performance using Grafana and Loki dashboards, identifying and resolving bottlenecks during build, testing, and deployment phases to maintain high availability.

Ntuple Global Limited

Hong Kong

Full-stack Developer/Senior Software Developer (Remote from Canada)

Oct 2022 – Mar 2025

- Designed and developed full-stack web applications (React/Next.js frontend, Node.js/Python backend, MySQL/PostgreSQL databases) for multiple F&B, CRM, and enterprise clients, ensuring high performance, scalability, and security.
- Implemented system architecture to extract terabytes of data for ETL pipeline development for the largest public railway transport in Hong Kong, integrating with multiple data warehouse and service APIs.
- Developed Python-based API services with Selenium/Playwright for web automation and testing; managed data storage in MySQL and Amazon S3.
- Managed AWS EKS (Kubernetes), EC2, and cloud infrastructure. Designed CI/CD pipelines using GitHub Actions with automated testing and AWS SSM integration. Utilized Terraform and Ansible for Infrastructure as Code.
- Developed online ordering systems with payment gateway API integrations (Mastercard, Stripe, GlobalPayment) following modern security standards.
- Led and mentored development teams of 2-3 people, participating in project planning sessions to analyse requirements, provide time estimates, and ensure code quality across multiple client projects.

PCCW Solutions Limited

Hong Kong

Software Engineer

Oct 2021 – Oct 2022

- Provided on-site production and User Acceptance Testing (UAT) support for Oracle Weblogic Server to maintain server stability and reliability.
- Maintained current Java codebase and fulfilled client requests.
- Developed a backend program with Java to generate CSV files from the database for security analysis.

Chun Wo Limited

Hong Kong

Web Developer

Jul 2021 – Oct 2021

- Designed and created a full-stack web application with PHP framework Laravel, along with React.js and Tailwind as the frontend.
- Performed basic network security testing to find vulnerabilities and patch before production.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate: SAA - Expiration: 2027-07-20 - ID: 6571bd4dcd3542c084961a64105304f1

Linux Foundation Certified Kubernetes Application Developer: CKAD - ID: LF-sxumuxu0ty
